Decentralized Identifiers (DIDs)

- Identifiers for individuals, organizations, things, etc.
 - Decentralized, persistent, cryptographically verifiable, resolvable.
 - Created and managed using cryptographic keys in wallets.
 - Can be resolved to a DID document (contains public keys, service endpoints).
-
- `did:btcr2:k1qypcylxwhf8sykn2dztm6z8lxm43kwkyzf07qmp9jafv3zfntmpwtk9hmnrw`
